To whom it may concern,

Hearing of the employment opportunity that your company has to offer is quite exciting. For the past several months I have been developing software development skills while going through the Barren County Interapt/Skills program. During this program, I have spent time learning iOS development using the Swift programming language, as well as some of the basics of web development.

Being a Junior Developer, I am eager to learn new skills and improve on my current ones. I love to be challenged and to think outside the box, and to be creative. I hope that is what you are looking for in a future employee.

I believe my skills, personal qualities and eagerness to learn give me a solid foundation for this opportunity. Please review my attached resume and references. Thank you for your time and I hope to hear from you soon.

Sincerely,

**Jamie L. Cummings**
